Tech Note 21/08/2018 - Notice of potential issue with the 2019 CS Vary Bar - Single Front Line Flag Out Mechanism

Dear customers,

It has recently come to our attention that some of our 2019 CS VARY Bar has some potential issues in relation to the single line flagging system.

All our 2019 CS Vary bars are designed with a single front line safety that provides 100% depower upon release. After release, the kite should flag out completely on a single front line. With the potential issue, the kite flags out partially and remains in double front line safety mode.

Safety is the highest priority for Eleveight, and to ensure that every bar meets our E/8 trusted quality standards we will offer a free replacement set of front lines for all existing customers of the 2019 CS Vary bar.

Name of products:

- ECB1947051 - CS Vary bar small
- ECB1952051 - CS Vary bar large

Please contact your local dealer to discuss the exchange in detail or contact us if you need further help or assistance.

Email: sales@eleveightkites.com

Our thanks in advance for your understanding.

Team Eleveight
